

Multiplication and Division Drill Tests

Dear Parents and Students,

Beginning this quarter, students will take multiplication drill tests. They will test each day. The tests are 42 problems and 2 minute tests. They will progress by facts, starting with 0's and 1's. Students will advance at their own pace. They need to master a fact with a 100% in order to move on to the next fact. At the end of the quarter, they will receive one test grade based on how many facts they mastered. See the grading scale at the bottom of the page to see how they will be scored.

For fourth quarter, students will begin division drill tests, following the exact same process.

Students are expected to master through the 10's each quarter. If they master 11's, 12's, and a 5-minute mixed fact test, they will receive bonus for each.

Grading Scale:

10's: 100A+	9's: 90B	8's: 80C	7's: 70D-	6's: 60F
5's: 50F	4's: 40F	3's: 30F	2's: 20F	0/1's: 10F

Since we will be taking tests daily, students will not be required to complete XtraMath each day for a grade. They are encouraged to continue XtraMath in order to practice for the tests. All students have been advanced to multiplication for 3rd quarter.

Please don't hesitate to ask if you have any questions!
